**A Very Early Communication
from Monty**

Monty *Groan*

Man God bless you.

Monty **Easier . . . easier . . .**

Man A bit easier, this time, is it.

Monty **Yes.**

Man Good, well done.

Monty **. . . when . . . my wife is not present.**

Man It's a bit easier, is it?

Monty **I . . . I had absolutely no idea . . . what . . . spirits . . . have to go . . . through . . . in order to communicate.**

Man I'm sure it's very difficult.

Monty **I think so.**

I have . . . problems . . . being able to speak at all . . . and I . . . am conscious . . . that I . . . don't sound . . . as I should.

Man We can understand the words. That's the main thing.

Monty **It would not be enough . . . for any of my . . . former colleagues.**

Man We understand.

Monty **If anyone knew . . . enough . . . [unclear comment] . . . I have come . . . to speak to you . . . about my work.**

Man Thank you.

Monty **I . . . adore Veronica.**

You understand.

Man We do indeed. And I'm sure it's reciprocated.

Monty **She . . . was, quite . . . simply, the light . . . of my life . . . and . . . drove me . . . forward to do things I . . . would never have done . . . without her.**

I am . . . distressed . . . by the fact that . . . the proof I can give you . . . is justly limited . . . and I . . . have to . . . really . . . communicate . . . in the best way I can.

I know . . . [unclear phrase] . . . through the scientific . . . quarter . . . are very real tests . . . and studies . . . that could only be . . . accepted without ridicule . . . if they are . . . completed . . . most rigorously . . . in a fashion . . . that will totally . . . annihilate the arguments of the sceptics.

My dear wife . . . cannot do this.

She does not have . . . the technical knowledge . . . although she has the verve . . . although she has the conviction.

Nevertheless . . . despite her great temper . . . the other sceptics . . . and the colleagues of mine . . . would wipe the floor with her . . . and I . . . do not wish her . . . to join me, as yet . . . She's not healthy . . . has many things wrong with her . . . physically . . . and is no spring chicken.

This worries me more than anything else.

She can present evidence as a widow . . . but she can't present evidence . . . as a scientist. For that is not what she is.

I have come to realise . . . one cannot be . . . anything other than oneself . . . and I don't care . . . about the political aspect . . . and the arrogance

that exists . . . within this . . . sphere of study . . . It doesn't matter to me anymore . . . whether my name is attached . . . to any of the data at all.

What matters to me more than anything . . . is that all the work and study . . . that I have done . . . in my time on earth . . . will be made use of . . . For I know . . . that the information I acquired . . . after very deliberate study . . . is of great importance . . . and as long as somebody . . . can present it in a manner . . . akin to my own . . . with good double-blind studies . . . the logical analysis . . . but also . . . with a clear mind . . . That is all that matters.

The work that my wife . . . wishes to carry out . . . should be seen . . . as a method of bringing comfort . . . to other bereaved wives . . . and husbands . . . and, indeed, to all those . . . who worry . . . and question where . . . their . . . lost family have gone to.

It took us . . . a while . . . David and I . . . to become convinced . . . of the reality of survival.

The phenomena . . . I have catalogued . . . over more than forty five years . . . carries great weight.

It should not be lost.

Loud high-pitched sound in microphone

Monty Sorry.

If you only knew . . . the very real problem . . . we have from over here . . . in talking to you . . . then . . . stupid investigators . . . would know not to fire questions . . . and would realise . . . that their communicators are doing . . . their very best . . . and without disrespect . . . I must say . . . that . . . communication . . . is only as good . . . as the instrument . . . through which . . . you can work.

Here . . . there is an immense energy . . . and it has been directed . . . in a particular fine path.

It is . . . lovely . . . here . . . with you.

Man Thank you.

Monty Quite lovely !

Man It's nice to have you with us.

Monty I'm part of the network . . . I may call again . . . if I may.

Man Good.

Sitters That would be wonderful, thank you.

Man God bless, Monty.

Sitters God bless you.
